Common Issues & How the Manual Helps Resolve Them

Below are some frequent problems drivers encounter with the Citroën Nemo and how the driver's manual can guide you through resolving them.

1. Dashboard Warning Lights Illumination

When a warning light appears, the manual provides a diagnostic table that lists each icon, its meaning, and recommended actions. For example, a "Check Engine" light may indicate a simple sensor fault that can be cleared by disconnecting the battery for a few minutes.

2. Tire Pressure Monitoring System (TPMS) Alerts

TPMS warnings can be addressed by checking the tire pressure with a manual gauge and inflating to the recommended PSI. The manual lists the correct PSI values for each tire size.

3. Infotainment System Freezes

Restart the infotainment system by holding the power button for 10 seconds. If the issue persists, the manual advises performing a soft reset or contacting Citroën support.

4. Low Fuel Warning

Refer to the manual's fuel gauge section to determine the exact range. The manual also recommends the nearest network of Citroën service stations.

Check the engine oil level and quality. If the oil is low or dirty, refer to the maintenance schedule for a recommended oil change interval. The manual also explains how to check the coolant level.
